

# Sprint Planning 3

**Team:** Group 3

**Sprint:**3

**Date:** 2/09/2020

**Attended:**

**Scrum Master:** Darren Lieu

**Product Owner:** Mohamad Ali

**Development team:** Benny Yang, Ben Cracknell, Yin Yen Chong and Mitchell Slavik

## 1) Goal

### Sprint Goal:

- Implement posting functionality
- Deployment to AWS
- Deploy with CircleCI
- Integrate SQL database
- Write unit testing for front and backend
- Update sprint documentation
- Write test log
- Code review

## 2) Duration of the sprint

- The group is given 9 days to work through an estimated workload of 4 days. The team consist of 5 members with decent amount of experience; thus, this is a rough estimate for sprint three.

## 3) What is the team's vision for this sprint

- Have unit testing for most of the core functions implemented in both the back and front end
- Be able to have the front end modify data in a database
- Plan and develop the database structure we will use for the final product
- Continue with sprint 2 tasks which are still in progress

#### **4) Estimation in story points**

- Time: 1 day, scrum points 3: As a business owner, I want to be able to see all the booking so we can track how well our service are doing
- Time: 1 day, scrum points 3: As a business owner, I want to see a list of all employee working for my business, so I can see who works for me
- Time: 1 day, scrum points 3: As a employee, I want to see a list of user that made a booking with our business, so I can find their contact details if necessary
- Time: 1 day, scrum points 3: As a user, I want a list of business so I can find out about their services
