

Sprint Planning 4

Team: Group 3

Sprint: 4

Date: 19/09/2020

Attended:

Scrum Master: Darren Lieu

Product Owner: Mohamad Ali

Development team: Benny Yang, Ben Cracknell, Mitchell Slavik, Yin Yen Chong

1) Goal

Sprint Goal:

- Update product backlog and prioritise backlog
- Perform daily Scrum and documentation
- Keep Trello up to date
- Connect and implement database
- Update unit tests to reflect refactored code
- Implement Login functionality
- Refactoring of objects variable to better implement object-oriented programming principles
- Fix AWS issues with connecting user and employee in database

2) Duration of the sprint

- The group is given 14 days to work through an estimated workload of 8 days. The team consist of 5 members with limited experience; thus, this is a rough estimate for sprint 4.

3) What is the team's vision for this sprint

- Gain new skills and be more adept with Spring Boot and React
- Implement all functionality stated in sprint goal section
- Regularly communicate and collaborate
- Refactor code to remove unnecessary code and to make it more understandable

4) Estimation in story points

- Time: 4 day, scrum points 8: As a customer I would like to be able to log into my account to see my details
- Time: 4 day, scrum points 8: As an employee, I want to be able to log into my account to see my details
- Time: 2 hours, scrum points 3: As a customer, I want to be able to see my own details so that I can confirm that I have entered them correctly
- Time: 2 hours, scrum points 3: As an employee, I want to be able to see my own details so that I can confirm that I have entered them correctly
