

Project Sprint Retrospective Notes

Team: 3

Sprint: 3

Date: 20/09/2020

Attended:

Scrum Master: Darren Lieu

Product Owner: Mohamad Ali

Development team: Benny Yang, Ben Cracknell, Yin Yen Chong and Mitchell Slavik

1. Things That Went Well

- *Communication between members*
- *Good progress on tasks*
- *Maintained good team morale*
- *Asked product owner for advice and clarification*

2. Things That Could Have Gone Better

- *More meetups with group*
- *Do more research outside of tutorials*

3. Things That Surprised Us

- *Implementation of CircleCI*
- *Confusion over JUnit version to use*
- *Unit tests initially failing to pass for certain members even though they pass for other group members*
- *Difficulty of AWS*

4. Lessons Learned

- *How to do unit testing for front and back end*
- *Further understanding of how Spring Boot and React work*
- *How CircleCI works and how to implement it*

5. Final Thoughts

All in all, our team successfully managed to complete sprint 3. We were able to maintain good team morale which in turned helped us to finish our tasks despite the initial difficulties. We were able to implement features that we initially planned to add, and we were also able to complete the necessary sprint documents. In the next sprint, we will continue to focus on implementing more features and unit tests while also continuing to use CircleCI.
